I know we were meant to meet today but I have a interview so I need to prepare for it. I think tomorrow works perfect at 6pm

Rahul P

Brilliant - appreciate that Tsotne I'll have a read in an hour or so.

RP

Yeah I agree, 6pm tomorrow works for me! See you all then

AJ

A

I can now confirm I have received the emails and will implement the contents of the email as soon as possible.

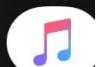

Tsot

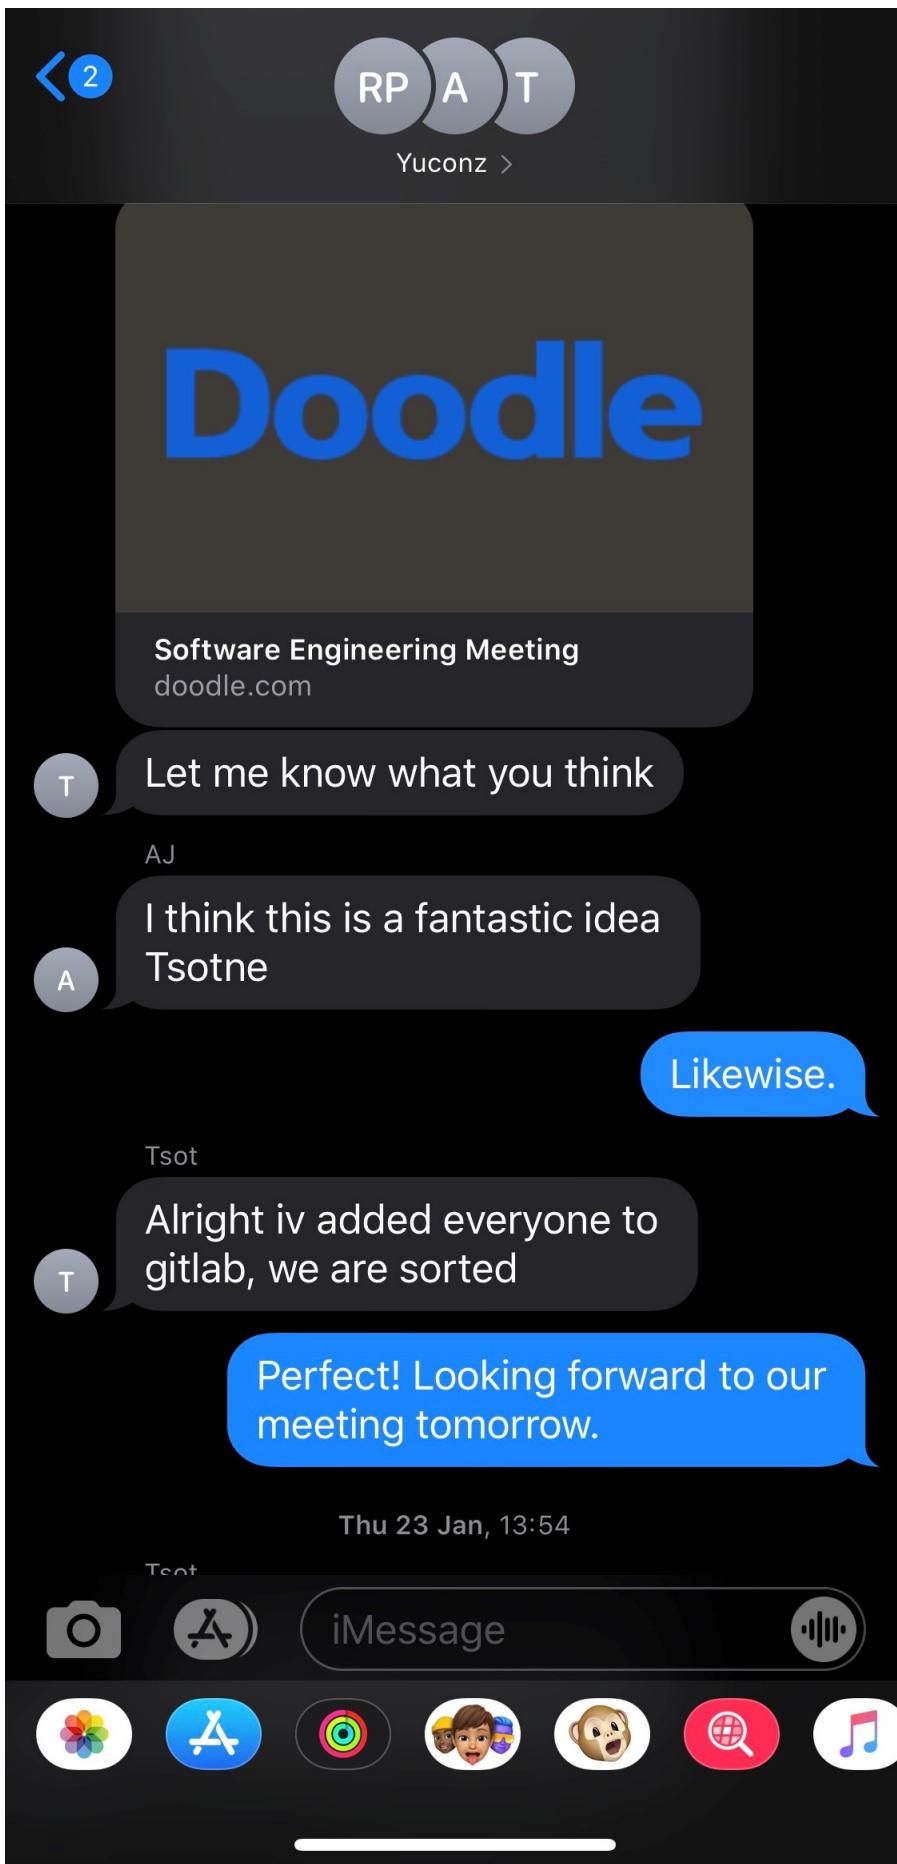

Great. I thought we could use an app to schedule meetings dynamically, making it easier for everyone

I would like to invite you to the Doodle poll "Software Engineering Meeting"

Just checked my email guys,  
and a gitlab repository has  
actually been created for us

In addition to the website,  
download the app on your  
mobiles to stay up to date with  
the current to do list.

AJ

A

This is great. It will really help  
us track things and do them as  
efficiently as possible.

Great idea.

Tuesday 16:26

Hey guys, I have booked  
conference room 2 at the  
library on floor 2 tomorrow at  
7pm. We can meet-up and get  
a good amount of work  
completed.

Rahul P

RP

Sounds good - will see you  
guys there!

Brilliant, looking forward to it!

Apologies for not being able to make it today. Tomorrow sounds perfect, should we meet on friday as well?

T

Wednesday 13:22

Tsot

Hey guys, take a look at these videos before today if you can(even if your git doesnt work).

**Working  
With  
Branches**

GIT: Working with Branches  
[youtube.com](https://youtube.com)

Git  
Merge  
and  
Workflow

have not started this. It is noted that work on this should not begin until we have gained clarification from Miles. Shall I include a screenshot of the blank email and say that we had an email error which has delayed the creation of class diagram?

RP

Tsot  
have different access levels from ordinary users, but might wish to login without elevated privileges. Which was absent in the UML Diagram provided.  
Do you still want to implement this? If so we can add this to the Diagram.  
While this might not be obvious from the diagram, I think it is present  
in the scenario description: "1. User provides user name and password and requested access rights." That is also primarily why the different user types are shown in the Authentication diagram. So, I am not sure that anything further needs adding to the diagram to support this.  
>  
> Our other question is that in the Read personal details use case, its not specified that only the staff member the document pertains to can read it, along with HR. Which contradicts the Yuconz Description document which you provided. Would you be able to clarify this?  
As I mentioned in my talk last term, I want the
